JUNE 65

Philmont's FIELD DAY
June 26-27

The BLURB is published monthly by and for the members of the Phil-Mont Mobile Radio Club. Our purpose is to further the interest of amateur radio in general and mobile radio in particular. We endeavor to keep the news accurate, interesting and in a small way, educational. Copying and quoting is permitted, with a credit line, and we gladly exchange subscriptions with other clubs.

DEADLINE: The BLURB is mailed on the last Monday of each month. All material must be in the hands of the Department Editor before the 15th of the month.

Apr. 14	W3WNC (Stag Dinner)	Oct. 20
May 19		Nov. 17
June 16		Dec. 15

THE PREZ SEZ

This month you have a very large BLURB, concerned mostly with Field Day, just as it should be. May has been a wonderful month for Phil-Mont with one or two activities every week. The June schedule which appears elsewhere in this issue is also replete with activities --- there is something for everyone. Let us all participate.

The most important event of the month is Field Day. Your committee has prepared a program of events which should satisfy those who want to win as well as those who want to have a good time.

There is one thing that each of us can do and should do to make Field Day a success. First, you can operate for 24 hours; second, you can make a few contacts; third, if the foregoing are too much, you can come out to the Field Day site for food, conversation and sun; and, lastly, and everyone can do this, SEND A FIELD DAY MESSAGE.

Remember, however, Field Day does not really end on Sunday night, everything you may do is no good for the point count unless you get in your log. With this I conclude with what may well be our motto for this year - "Have fun with Phil-Mont on Field Day".

73 de K3HIJ

* * * * *

IT SEEMS TO ME

At last it has arrived! the day on which I write the last of these little notes. It has been officially announced that Lloyd Sherman, W3CDY, will work with me for a few issues to "get the feel of it" and then take over as Editor.

I must admit that I give up this task with some reluctance, for it has been interesting and educational, but also very demanding and for that reason alone I must step down.

I thank all those who have worked so hard to help me, and also those who promised help but never quite made it - I'm sure you meant well. To Lloyd I say, "The best of luck". To the club membership a reminder - this is your BLURB. It is as good as you want it to be and are willing to help make it. Give Lloyd all the assistance possible.

I expect to get some time to do a little "hamming" now, maybe I'll even get to talk to a few Phil-Monters on Channel 1. Once again, my sincere thanks and best wishes to you all - it has been an honor to serve Phil-Mont.

de K3KUD

PHIL-MONT CALENDER FOR JUNE, 1965

Saturday	June 5		Picnic at French Creek Park.
Monday	June 7	6:00 PM	Supper Club, MLA Club, Philadelphia
Monday	June 7	8:00 PM	Regular meeting, Franklin Institute.
Wednesday	June 16	8:00 PM	Mid-month meeting at W3FLP
Friday	June 18	All day	School is out-MOBILE WITH CARE !
Saturday) Sunday)	June 26-27		Field Day at K3WOC, Villanova, Pa.
Monday	June 28	8:00 PM	BLURB folding at W3LEM

* * * * *

NEWS AND ACTIVITIES

The regular meeting of the Phil-Mont Mobile Radio Club, Inc. was held on Monday, May 3 at the Franklin Institute. The program consisted of a movie about the Boy Scout Canoe Race "Paddle-Rama". Since the Club is furnishing communications for this year's race, the picture had a special significance. A short talk by George Weed, W3MHR, on the trials, tribulations and rewards of becoming the owner of a 50 foot tilt-over tower was followed by the main feature of the evening, a talk and demonstration by W2VX, Charlie Jenkins, of proportional radio control for models. The entire program was interesting and all present had an enjoyable time.

* * * * *

Despite all the talk we hear about lack of activity on Channel 1, it is still a pretty busy place. For example: On April 30, 1965, 37 stations were heard during the day. 23 of these stations were mobile, the rest fixed. This is not unusual at all which just goes to prove that we still have some AM activity.

* * * * *

We hear that Lyle Quinn, W3VSU, has suffered another heart attack and is (or was) back in the hospital. We sincerely hope that by the time this is printed he will back on his feet and feeling great.

* * * * *

The Amateur Radio Public Service Corps, in cooperation with Wanamaker's, demonstrated amateur radio message handling during the period May 3-22 by handling radiograms for visitors at no cost, from a station set-up in Wanamaker's Crystal Room. It was noted in the publicity releases that such message handling is only one of the services amateurs perform daily.

* * * * *

Saturday, May 8, saw the Balloonatics hard at work at the Air Fair at Wing Field, Ambler. Present were W3AES, QQH, DJW, CDY, INN, YHV, MHR and K3UWO, CEE, WQQ, KUD -oops - almost forgot W3OWK, WA2RDC and W3QV who relayed for us from the home station. Skydivers, antique aircraft, and best of all, the balloon chase, provided a lot fun for all those present. A great many visitors stopped by the trailer and were apparently much impressed. All in all, it was a most successful day, and everyone was busy, but enjoying it.

* * * * *

CLUB NEWS AND ACTIVITIES (continued)

Due to the lateness of our mid-month last month there were a few items which did not make it into the May BLURB. One of these items was the election to membership of four candidates, Sam, WA3CNI; "Kiffle", K3KFL; Doc, K3WOC; and Gerry, W3JKH. Welcome and congratulations to the newcomers. Another item of interest which went right by your "eagle-eyed (?)\" reporter is the fact that Jess, W3UAU and his XYL, Holly, have departed the area. It seems that a change in work plans required their presence in California and off they went. The BLURB of course lost its XYL Editor with Holly's departure and the club lost a real nice pair of people.

* * * * *

Don't forget the Phil-Mont picnic on Saturday, June 5. The location is the Six Penny Area of French Creek State Park and a map of the route appears in this issue. In case of rain the picnic will be held on Saturday, June 12 - same place. Why don't you gather up the family and the lunch and join us for a good time?

* * * * *

The Phil-Mont Six Meter Net is showing some progress. Sam, K3RTR, and Art, K3OEJ, have volunteered to serve as alternate net control stations in order that Walt, K3OJA, can have an occasional day off. The number of stations checking in is on the increase and the minor problems which plagued us in the beginning are working out very nicely. If you have a rig on six why not check in on Sunday morning, 1000-1100, 50.7 mc.

* * * * *

Sunday, May 2 saw a group of Philmonters engaged in providing communication for a sports car rally in the Eastern Montgomery County area. W3RQZ/m was set-up in Willow Grove and manned most efficiently by Jon, K3HWX and Gil, W3SRU. Kermit, W3AJO/m and Mike, K3WQQ/m, provided the roving coverage, and from all reports, the whole affair went very well.

* * * * *

Don't forget to make plans to help out with the AMA Championships at Willow Grove. There will be plenty of fun, fellowship and foolishness - Every Single Minute!

The date is the last week of July, with the finals coming on the week-end of July 31-August 1. The Navy Flight Demonstration Team, THE BLUE ANGELS, will appear during the final week-end, weather permitting.

* * * * *

The Phil-Mont Supper Club, the social branch of Phil-Mont, will meet on Monday, June 7, at 6:00 PM at the MLA Club, 1513 Walnut St., Philadelphia. Seriously, everyone who makes one of these get-togethers seems to have a wonderful time, and we therefor recommend it. After dinner the gang comes up to the Franklin Institute and attends the monthly meeting.

* * * * *

We do not have a definite date for the lucheon group, but they will be getting together about the 9th of June. Joe, K3HIJ, will have more information on time and place and will see that it gets on 10-on-10 in time for making plans.

* * * * *

NEWS AND ACTIVITIES (continued)

Phil-Mont and the Reading Radio Club will get together on Sunday, July 25 for a clambake. The location will be Berkshire Meadows, about 2 miles from Reading, and just a pleasant drive for a Sunday, from this area. The menu will consist of 12 clams, a baked potato, baked beans, an ear of corn, plenty of beer and soft drinks. For those who do not prefer clams, there will be a cold lunch, served smorgasbord style. Make plans now to attend this event, and be sure to let Al Jorrett, W3OWK, or any member of the Activities Committee know that you are interested.

* * * * *

The long-awaited Field Day information is contained in the special section of this issue. This year looks like a lot of fun and fellowship - be sure to attend.

* * * * *

NEW PRODUCTS OF INTEREST

Hallicrafters Company has announced a new 500 watt PEP amateur transceiver, which they call the SR-500 "Tornado". This unit provides high performance SSB and CW operation on 80M; 40M; and 20M. Lower sideband is used on 80 and 40 meters and upper sideband on 20 meters.

The unit weighs only 13½ pounds and has cabinet dimensions of 13"Wx6-3/8" H x11" deep. Amateur net price is \$395.00

The transceiver incorporates Hallicrafters' exclusive Amplified Automatic Level Control (AALC) which prevents "splatter" often caused by final amplifier "flat-topping".

The receiver section contains Receiver Incremental Tuning (RIT) which permits tuning up to 3 kc either side of the xmtr frequency. All jacks and switching for linear amplifier operation are provided, as well as a combination "S" meter/RF output meter. Dial calibration is in 5 kc increments, which are accurate to less than 2 kc between 100 kc points after indexing. Sensitivity is 1 microvolt for 20db S/N.

Operating accessories for the SR-500 are the HA-16 VOX adapter; a P-500 AC power supply for base station operation and a P-500 DC power supply for operation from a 12.6 v DC source. A special MR-160 mobile installation kit is also available which includes all interconnecting cables.

Hallicrafters Company Release

* * * * *

The armed forces will soon have at their disposal a compact UHF transmitter-receiver with 3500 channels. The unit, AN/PRC-66 is being developed by Collins Radio Company of Canada, Ltd.

The transceiver design consists of an all solid-state device, including integrated circuits, thin-films, and discrete components. Nearly all circuits are micro-electronic. The only exceptions being the power amplifier and r-f amplifiers.

Because of the low power requirements and high efficiency of the transceiver, a compact battery may be used as the power source. The battery will be attached to the transceiver with slide fasteners so that it can be replaced easily and quickly.

The transceiver, without battery, measures 1½x4x6 inches and weighs less than 2 lbs. With battery, its weight is less than 10 lbs.

* * * * *

TID-BITS

A government bureau announced recently that radio-controlled garage-door openers are becoming a menace to aviation in some parts of the country. The Federal Aviation Agency said that in Los Angeles area alone it recently tracked down 58 garage-door openers in a single week and took them off the air for interfering with air navigation signals.

The FAA said it has legal power to close down equipment of this type which may cause harmful interference with aeronautical radio navigation or other safety devices.

The agency is working closely with the Federal Communications Commission and the military services in a program to eliminate this type of radio interference.

The FAA said the main offenders are door openers operating in the 230 to 290 megacycle (UHF) radio band. This includes the military emergency frequency of 243 mc and represents a large part of the entire military UHF band used for aircraft communications.

Door opening devices are activated by small receivers which usually are mounted on garage rafters and operate around the clock. They are tuned to the same frequency as short range transmitters in their owner's auto. A potentially hazardous receiver emits a continuous signal equivalent to that of a small radio transmitter because its antenna is not sufficiently isolated from its generating parts.

The FAA said some signals from door openers are strong enough to be picked up by aircraft as far away as 16 miles. A pilot thus could inadvertently home in on a garage door signal and fly directly toward it with great accuracy - and disastrous results.

(AP) The Philadelphia
Bulletin, May 13, 1965

* * * * *

There is an article on page 32 of May, 1965 CQ Magazine about coaxial cable which is recommended for all those who do not know ALL about it.

* * * * *

A late flash from Jon Balch, K3HWX et al, informs me that the correct count on the hams attending the Air Fair was as follows: Twenty-one Philmonters; five North Penn-ers; and six unattached (Club-wise). My thanks for the information and my apologies for not having had the correct count when I wrote up the original report.

* * * * *

Lloyd Sherman, W3CDY, reports that the Paddle-rama, which is the Boy Scout canoe race, is scheduled for August 21 and 22 and with lots of help and careful scheduling we can avoid requiring anyone to spend two days working this event.

* * * * *

Some 8000 Boy Scouts and 20,000 visitors invaded Fairmount Park on the week-end of May 15-16. It was the Camporall, an event held every four years to bring together all scouting units in Philadelphia. Completely surrounded by boy scouts and trees, barely visible in the reflected light of ceremonial campfires and candles, stood W3RQZ/portable. Manned by Jon Balch, K3HWX/W3AES/etc. and several other Philmonters, the truck was used to provide such communication as was necessary via the amateur bands.

FRENCH CREEK PARK

A FEW LATE ITEMS OF INTEREST

On June 6 club members can have a final shot at the micro-wave gear. After that date all remaining will be sold for JUNK.

* * * * *

We have acquired an air-conditioner for the trailer. It will be available and installed for Field Day.

* * * * *

Wayne Zeigler, our Club Historian, has been issued the call WB2SZF, and will heard both mobile and fixed in the next few weeks. Our congrats!

* * * * *

George Weed, W3MHR, our Tower Expert, has passed his Amateur Extra examination. Congratulations to you too, George.

* * * * *

Bill Bubeck, W3YHV, our BLURB printer, is on an extended vacation trip, mobiling across these United States.

* * * * *

Next month we will have more comments on Incentive Licensing - may give you some ideas for that document you are going to file with FCC.

* * * * *

The By-Laws Committee has about completed the major part its work - they will report on the proposed changes at the June meeting. This is a matter of interest to all members - try to be present.

* * * * *

LET'S ALL GET BEHIND THE FIELD DAY COMMITTEE - SEND A MESSAGE, COME OUT TO THE SITE, OPERATE. YOU WILL HAVE FUN AND YOU WILL HELP THE CLUB. MAKE PHIL-MONT FIRST ON FIELD DAY - IT'S YOUR CLUB!

IN MEMORIAM

Richard C. Berens, W3UMK
Died April 26, 1965

Dick Berens, or UMKEE as he was known on Channel 1, was a ham since 1949. In recent years he was active in Civil Defense, RACES, and The Delaware Valley Council of Radio Clubs, of which he was Acting Chairman.

Dick was also a member of the Amateur Radio Editors Association; Editor of the Bulletin of The Delaware Valley Council; and an Associate Editor of THE BLURB. A graduate of Yale University, Dick was employed by the United States Government in the Philadelphia area. Dick was one of the prime movers in setting-up the radio club at the Defense Textile and Clothing Center, and was frequently heard by "the listening multitude" acting as NCS for the Phil-Mont early morning nets. Dick is survived by his wife Kay and daughter Connie.

John H. Stephens, W3RVM
Died May 1, 1965

John H. Stevens was a comparative newcomer to Phil-Mont, but was well known and frequently heard from his mobile. John was president of Tactair Fluid Controls, Inc., manufacturers of aircraft equipment. He was also vice-president and director of a subsidiary company Tactair, Inc. of Bridgeport, Montgomery County. John is survived by his wife Mary Grace, and three sons.

The entire membership of Phil-Mont extends its sympathy to the families of our departed members. They have joined Silent Keys, but they are not forgotten by the amateur radio fraternity.

CQ FD

CQ FD

CQ FD

Get ready for Field Day, June 26-27. Phil-Mont is going "whole hog" this year with aggregate mobile participation (Class C) as well as tent portables - W3RQZ/3 with three or four transmitters in simultaneous operation (Class A).

This means plenty of operating, mobile and portable, 2 meters through 80 meters, AM - CW - SSB. Take your pick, or, better yet, TRY THEM ALL from W3RQZ/3!

Our FD location, changed from last year, will be in Villanova at the QTH of K3WOC, Routes 320 and 23. (See map) Doc's villa not only provides us with an excellent location, accessibility, and space for the Red Truck and trailer, portable stations, parking, but also provides room for those who wish to pitch their own tents.

Plenty of food and refreshments will be available to those taking part -
-so come on out.....we need operators!

Those operating for the club aggregate mobile score will find a FD Log, Message Data Sheet, and Sample Radiograms on the following pages. More are available and will be given to those participating by the FD week-end.

The message operation will work like a chain letter, similar to last year. EVERY MEMBER SHOULD ORIGINATE A FIELD DAY MESSAGE FROM HIS MOBILE WHETHER PARTICIPATING IN MESSAGE HANDLING OR NOT! This message should be sent to W3RQZ/m before 11 PM Saturday night, and it should be in the form of the sample enclosed. Use it and keep it for your records. Make the signature only your call letters.

IMPORTANT In order to save time the message forms furnished will require only a few entries. Pass along only the entries. (except your own original message, this must be sent to W3RQZ/m in full). As a convenience, the BLURB contains a Message Data Sheet which can be used to list all the information, filling-in the blanks on the actual message forms at a later date.

OUTLINE OF MESSAGE HANDLING

- (1) W3RQZ/m receives messages from members before 11 PM Saturday.
- (2) At 11 PM RQZ/m sends all messages he has received to W3AWH/m, transmitting only the entries in the sample form. AWH records these entries on his Message Data Sheet, making sure to note the approximate time of receipt of each message.
- (3) At 11:30 PM AWH/m sends to W3AES/m reading his Message Data Sheet, and noting the time of each message he relays in the REMARKS column - for this information will be needed later.
- (4) Message handling continues until W3TKQ/m, at the end of the line, receives all the messages.

* * * * *

FIELD DAY SECTION - THE BLURB

- (5) NOTE - You cannot relay your own message - so DO NOT ACCEPT IT - have it passed around you to the station following you. (W3RQZ will relay AWH's message to W3AES, AWH relays AES's message to CDY, etc.)
- (6) If possible, rendezvous with your relay station at close range and use channel 2 (29.626 mc) to run your traffic. If any difficulty arises always return to Channel 1 and W3RQZ/m for assistance.

MESSAGE SCHEDULE
